Square30 neatly fixes directly to the ceiling, eliminating ceiling/track shadow line.

SQUARE30 BENDABLE

Square30 Bendable Track can be bent or curved by hand on site to fit most bay windows, including returns in the room.

STANDARD or SURF
GLIDER OPTIONS

SURF GLIDERS

SURF GLIDERS

SURF 60

Standard wall brackets will allow curtains to stack back correctly with SURF 60 gliders.

This features a shallower and smaller profile both front and back, making it suitable for narrower recesses but will exhibit a slightly larger stack back.

SURF 80

Use adjustable brackets (75mm-110mm minimum) to allow curtains to stack back correctly with SURF 80.

This provides a deeper profile with increased spacing from the front and back.

MAGNETIC GLIDER BRAKE

to ensure curtains stay stacked back

With glider brake

Without glider brake
